Please provide details of the nature of the business-related travel:

4. When was the last time that you maintained a valid motor vehicle log book for a continuous 12-week period?

5. When determining the business use percentage of the car was there any change in the business use of the car?

YES/NO

If **yes**, how has the claim for car expenses under the log book method been adjusted to take this into account?

(we recommend that you explain the nature of the business travel by maintaining an annual log book to ensure that the ATO cannot question the accuracy of the log book business use percentage)

Please note:

1. *Where a taxpayer has claimed car expenses under the log book then a taxable profit or a deductible loss may arise on the disposal of the car;*
2. *Before you can claim car expenses under the log book method you must be the owner or lessee of the car or hirer of the car under a hire purchase arrangement; and*
3. *You must have a valid log book that explains the business use percentage that you have relied upon in making a claim for car expenses under the log book method.*

Home Charging Electricity Deduction Worksheet

An individual taxpayer may rely upon the ATO's home charging rate methodology in **PCG 2024/2** to calculate the electricity costs of charging an electric vehicle at their home where all of the following conditions are satisfied:

1. The car or motor vehicle must be an eligible 'zero emissions vehicle'.
2. The zero emissions vehicle is used (at least somewhat) while carrying out their income earning activities.
3. The individual taxpayer has incurred electricity expenses when charging their zero emissions vehicle at their home.
4. The individual taxpayer has kept the relevant records for the income year.

Step 1 – Calculate the home charging electricity cost

Total kilometres x 4.20 cents per kilometre = Home charging electricity cost

_____ x 4.20 cents per kilometre = _____

Step 2 – Calculate the home charging electricity deduction

Business kilometres ÷ Total kilometres x Home charging electricity cost

_____ ÷ _____ x _____ = _____
